

# The intelligent GÜNTHER solution

Industry:	Automotive
Part description:	Enclosure
Material type:	PA 6.6 GF 25
Articel weight::	190 g
Task:	Accuracy in dimensioning. Absolute concentricity.
Challenge:	The processing of fibreglass-filled materials requires protection against wear in the hot runner system e.g. nozzles with hard metal tip.

## The intelligent **GÜNTHER** solution:

Mould with 8SET60H / R40 nozzles. Direct gating.  
Optimum temperature control and thermal isolation of mould and hot runner system through nozzles with insulated shaft, such as e.g.. ...ET type.
